# New movies coming out in the month of June, 2012

**Prometheus** - Visionary filmmaker Ridley Scott returns to the genre he helped define (Alien), creating an original science fiction epic set in the most dangerous corners of the universe. The film takes a team of scientists and explorers on a thrilling journey that will test their physical and mental limits and strand them on a distant world, where they will discover the answers to our most profound questions and to life's ultimate mystery.

Here is a quick list of the latest movie releases for this month.
